5 June 2025

Subject Price Increase

To: All Kennedy Valve UL-FM and International Customers,

Kennedy Valve has been working to control manufacturing expenses via several ongoing projects. While we've received some relief, these efforts have not been able to offset the increasing costs of operating our facility and building products. As such we are implementing an across-the-board price increase of approximately 7%. We will be issuing an updated Price List to accommodate the change in discounted items.

Our XBFV product is not included in this announcement.

New prices will be effective 7 July 2025. Pricing documents will be updated and issued prior to 7 July.

Sincerely,

*Barry V O'Brien*
