## January 5, 2026 Price Increase

October 20, 2025

Dear Valued Customer,

Our Fire Suppression Systems business continues to face pressures due to the current economic conditions. We at IPEX are sensitive to the impact of price increases on your business but after careful review we have determined that it is necessary for IPEX to implement a price increase.

CPVC Pipe & Fittings, Cement and All Other Fire Suppression Products will see an increase of 7% effective on all new orders beginning Monday, January 5, 2026. Some prices may increase by more than 7%.

Purchases made before the price increase will be capped at an additional 1/12<sup>th</sup> of your annual purchases. Pre-increase orders must be placed with our customer service group by close of business Friday, January 2 for immediate release.

On behalf of everyone at IPEX, we would like to express our appreciation for your continued support and emphasize the importance we place on you as a partner. We remain committed to your success and look forward to supporting your growth into the future.

If you have any questions, please contact your IPEX Fire Suppression Systems representative.

Sincerely,

A handwritten signature in black ink, appearing to read "Brent Barnes".
