DEN HARTOG INDUSTRIES PRICING NOTIFICATION

Dear Valued Customer,

Since our previous communication on March 24th, 2026, resin costs have continued to escalate more rapidly and to even higher levels than anticipated. These increases are extreme and unprecedented over such a short period of time.

Ongoing geopolitical factors and global supply-chain disruptions are attributed to affecting the cost and availability of key feedstocks used in polyethylene production. As international markets increasingly compete for North American-produced resin, pricing has risen sharply and domestic supply has become constrained. With current communications received from multiple suppliers and industry sources, we do not anticipate meaningful relief in either pricing or availability in the near term.

We expect significant price volatility and supply issues resulting in material shortages to persist. We remain disciplined in controlling costs and minimizing customer impact wherever possible, continued escalation in resin costs may necessitate additional pricing actions in the future.

As a result of these conditions, Den Hartog Industries must implement another price adjustment. Effective May 4, 2026, we will implement a price increase of 8% on new orders for all products.

- Orders placed before May 4, 2026, and shipped by June 1, 2026, will be honored at the March 30, 2026 pricing.
- All new or open orders shipped on or after June 1, 2026, will be invoiced at revised pricing.

We value our partnership and sincerely appreciate your continued trust and support.

If you have any questions, please contact your sales representative.

Sincerely,

Brandie Van't Hul
